WORLD HEALTH DATA :::: STORY-FYING

Source of data:-
https://datacatalog.worldbank.org/dataset/health-nutrition-and-population-statistics

Pre-processing Work:-

To handle large number of null values and filtering out relevant pieces of information.

Pre-visualization Work:

I will be doing comparison b/w countries data for given years against selected "Indicator name".

The comparison will be somewhat like this:

Above map shows "The Adults (15+) living with HIV-2003".

And stories will be based on this visualization.
